

SPECIFICATIONS: WOODLAND SHADE MEADOWMAT®

- **STANDARD SIZE** 1m² Slabs
500mm wide (19.6")
1000mm long (39.3")
- **SOIL THICKNESS** 18mm - 20mm (0.78")
- **WEIGHT PER M²** 20kg – saturated weight may be up to 25kg
- **GRASS HEIGHT ON DESPATCH**
Approx. 100mm (4"). The product is mown before despatch to minimise damage to plants. It will not be in flower when it is delivered.

All measurements are approximate and taken when harvested.

- **GROWTH** Harrowden Woodland Shade Meadowmat® is a blend of 6 slow-growing grasses and 31 native and traditional wildflowers many of which could be found growing in woodland and hedgerows. All but one of the species are perennial which means they will flower every year if the conditions are suitable. The specially selected grasses ensure coverage all year round. Harrowden Woodland Shade Meadowmat® will contain mature plants, root fibre and enough soil to maintain the plants during establishment.

- **TYPICAL SEED MIXTURE*** 20% Native Grasses
80% Native and Traditional Wildflowers

- **SOIL CLASSIFICATION** Grown on a sandy loam and compost based substrate

OUR SHADE TOLERANT MEADOWMAT® ALLOWS YOU TO BRING THE SUBTLE HUES OF WOODLAND WILDFLOWERS INTO THE SHADIER PARTS OF YOUR GARDEN.

**The RHS Plants for Pollinators mark is only given to plants that support pollinating insects. Find out more at rhs.org.uk/plantsforpollinators

FEATURES: WOODLAND SHADE MEADOWMAT®

■ FEATURES

A mixture of mature plants that allows you to establish dense planting very quickly - more reliable than seeding and less time-consuming than plug planting.

Biodiverse and pollinator friendly providing a valuable source of nectar and food for many species of insects and birds.

Contains mainly perennial species to ensure a varied display each year.

Environmentally-friendly requiring no fertilisers or pesticides.

A mixture of grasses and wildflowers for year round interest.

Low maintenance – does not require regular mowing.

Prefers a neutral pH but can tolerate acidic or alkaline soils - for best results this product requires installation on a low nutrient soil.

IDEAL FOR:

BIODIVERSE LANDSCAPING SCHEMES

AREAS OF DAPPLED SHADE AROUND TREES OR HEDGEROWS

LOW MAINTENANCE AREAS

COMMERCIAL LANDSCAPING URBAN AREAS AND PARKS DOMESTIC GARDENS

WHAT'S IN OUR WOODLAND SHADE MEADOWMAT®

Coir fibre

**As sown. The actual percentage of each species contained may vary due to environmental factors. Harrowden makes every effort to ensure wildflower products are free from weeds and pests, however due to the natural way in which these products are grown we cannot guarantee they are 100% pest free on delivery. It is unlikely that you will see every species that is listed. The variation of species present has been developed to suit a wide variety of soils and environmental conditions. This will result in a product that will adapt to individual settings which may mean some species are more successful than others. Contains annual, bi-annual and perennial species. If installed after March many species may not flower during the first year.*
